

MD SAJJAD HOSSAIN

Senior Software QA Engineer | FinTech & Payment Systems

Dhaka, Bangladesh | ashrafazimsajjad@gmail.com | [+8801675972634](tel:+8801675972634) | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Senior Software QA Engineer with 5+ years of experience specializing in FinTech, digital wallets, payment systems, and enterprise applications. Currently working as the Core SQA Engineer for the FastPay Digital Wallet Ecosystem. Experienced in owning end-to-end QA activities, including test strategy, functional testing, API validation, automation, performance testing, and production support. Skilled in validating complex financial workflows such as payments, QR transactions, wallet operations, reconciliation, authentication, and transaction lifecycle management. Proven ability to drive software quality, mentor QA engineers, and collaborate with cross-functional teams to deliver reliable products.

PROFESSIONAL EXPERIENCE

Senior Software QA Engineer

[Newroz Technologies Limited](#)

March 2021 – Present | Dhaka, Bangladesh

- Own end-to-end QA activities across mobile applications, web platforms, APIs, and backend services.
- Analyse business requirements, technical specifications, and workflows to identify quality risks.
- Define test strategies, test plans, and testing approaches aligned with product objectives.
- Design and execute SIT, UAT, functional, regression, smoke, and production validation testing.
- Validate critical FinTech workflows including payment processing, transaction lifecycle, wallet operations, QR payments, reconciliation, and commission calculations.
- Perform API testing and validate service integrations for financial transactions.
- Automate regression scenarios using Selenium and Appium.
- Perform performance testing for critical authentication and payment transactions using JMeter.
- Participate in production deployments and perform post-release verification.
- Investigate production issues, perform root cause analysis, and coordinate defect resolution.
- Collaborate with product managers, developers, operation teams, and business stakeholders.

Intern

[Tomattos Technologies Limited](#)

December 2018 – July 2019 | Dhaka, Bangladesh

- Provided technical support and customer assistance for website related issues.
- Managed website content and assisted with e-commerce updates.
- Created and maintaining blog content, including medical articles and web content

Automation Testing: Selenium WebDriver, Appium, Playwright with Python (Learning)

API & Service Testing: Postman, API Validation

Performance Testing: Apache JMeter, Load Testing, Transaction Performance Testing

Mobile Testing: Android Application Testing, iOS Application Testing, Huawei Platform Testing

QA Tools & Platforms: Jira, Git, Telescope, Test Management Tools

Delivery Practices: Agile/Scrum, Release Validation, Production Support

EDUCATION

MSc in Software Engineering: Independent University, Bangladesh | 2024

BSc in Computer Science & Engineering: North South University | 2018

SELECTED PRODUCTION PROJECTS

FastPay Digital Wallet Ecosystem | March 2021 – Present

Large-scale FinTech digital wallet ecosystem supporting millions of customers and thousands of merchants through mobile applications, web platforms, APIs, and backend financial services.

- Own end-to-end QA activities across FastPay mobile apps, web platforms, APIs, and financial services.
- Validate critical FinTech workflows including payments, wallet transactions, QR payments, reconciliation, settlements, merchant operations, commission calculation, corporate salary management and other business-critical Fintech services.
- Lead SIT, UAT, regression, API, automation, performance, and production validation testing.
- Analyze production issues, perform defect investigation, and collaborate with cross-functional teams to ensure quality delivery.
- Drive continuous quality improvement by strengthening test coverage and release stability.

Service SDK Platform | Feb 2025 – Present

Digital travel and service platform integrated with First Iraqi Bank and FastPay, providing flight booking, hotel reservation, eSIM services, airline ticketing, and mobile SDK-based services.

- Validate travel workflows, payment integrations, and third-party service interactions.
- Perform functional, integration, regression, and release testing to ensure platform stability.
- Test mobile SDK functionality and support production release validation.

Iraq Charity Lottery Management System | June 2025 – September 2025

Charity lottery management platform in Iraq integrated with multiple payment gateways, supporting lottery operations and digital transaction processing.

- Validate lottery workflows, payment processing, and transaction lifecycle scenarios.
- Perform functional, integration, regression, and production validation testing.
- Ensure transaction accuracy, system reliability, and smooth payment gateway integrations.

Shotmob Football Live Score Application | June 2025 – Present

Live-score application focused on Iraqi football clubs, providing real-time match updates and football information to users.

- Validate live score workflows, application functionality, and user experience.
- Perform functional, regression, and release testing to ensure application stability.
- Identify defects, verify fixes, and support continuous product improvements.

ADDITIONAL EXPERIENCES

Kartat | Card Management System (Non-Production)

Card management platform responsible for handling card lifecycle operations, configurations, and related financial card services.

GlobPay | Cross-Border Payment Platform (FinTech, Non-Production)

FinTech payment platform focused on cross-border transaction workflows, including beneficiary management and country-level banking configurations.
